

Dartington Parish Council

Declaration of a Climate Emergency

Dartington Parish Council notes that:

1. Humans have already caused irreversible climate change, the impacts of which are being felt around the world. The IPCC reports that human activities are estimated to have caused approx. 1.0°C of global warming above pre-industrial levels with the likely range of 0.8°C to 1.2°C.
2. In order to reduce the chance of runaway Global Warming and limit the effects of Climate Breakdown, it is imperative that we as a species significantly reduce our CO² (carbon equivalent) emissions to less than 2 tonnes per person per year as soon as possible.
3. Individuals cannot be expected to make this reduction on their own. Society needs to change its laws, taxation, infrastructure, etc., to make low carbon living easier and the new norm.
4. Carbon emissions result from both production and consumption.
5. Unfortunately, our current plans and actions are not enough. The world is on track to overshoot the Paris Agreement's 1.5 degrees Celsius limit before 2050.ⁱ
6. The IPCC's Special Report on Global Warming of 1.5 degrees Celsius, published in November 2018, describes the enormous harm that a 2 degrees Celsius rise is likely to cause compared to a 1.5 degrees Celsius, and told us that limiting Global Warming to 1.5 degrees Celsius may still be possible with ambitious action from national and sub-national authorities, civil society, the private sector, indigenous peoples and local communities.ⁱⁱ
7. Local Councils around the world are responding by declaring a 'Climate Emergency' and committing resources to address this emergency.ⁱⁱⁱ

Dartington Parish Council believes that:

1. All governments (national, regional and local) have a duty to limit the negative impacts of Climate Breakdown, and local governments that recognize this should not wait for their national governments to change their policies. It is important for the residents of this parish and the UK that parishes, towns, cities and counties commit to carbon neutrality as quickly as possible.
2. Parishes, Towns, Cities and Local Authorities at all tiers are uniquely placed to lead the world in reducing carbon emissions; they are well placed to help decarbonize villages and more remote areas as they have closer links with their residents.^{iv}
3. The consequences of global temperature rising above 1.5 degrees Celsius are so severe that preventing this from happening must be humanity's number one priority.

4. Bold climate action can deliver economic benefits in terms of new jobs, economic savings and market opportunities, as well as improved personal, social and environmental well-being for people, locally and worldwide.

Dartington Parish Council thus:

1. Declares a 'Climate Emergency';
2. Aims to encourage and support the community of Dartington to become carbon neutral by 2030, taking into account both production and consumption emissions (scope 1,2,3*);
3. Calls on Westminster, Devon County Council and South Hams District Council to provide the powers and resources to make the 2030 target possible;
4. Calls on Westminster to appoint Citizens assemblies to develop the policies to deliver this target;
5. Agrees it will work with other local authority organisations such as neighbouring town and parish Councils, DALC (Devon Association of Local Councils) and appropriate government departments (both within the UK and internationally) to determine and implement best practice methods to limit Global Warming to less than 1.5 degrees Celsius above pre-industrial levels;
6. Agrees it will continue to work with partners across the district, county and region to deliver this new goal through all relevant strategies and plans;
7. Agrees it will place this issue on Parish Council agendas to agree strategies and action plans;
8. Agrees it will report the actions the Council will take to address this emergency within six months.

Proposed: Cllr Mark Jefferys
Seconded: Cllr Tessa King
